PROJECTS

Experimental analysis of Nano based phase change material to cater cooling needs.

Oct 2017 – April 2018

we prepared particles were in Nano range, and dispersed in PCM the latent heat was enhanced compared with pure PCM. and Nano based PCM has provided better cooling effect through regulating the temperature within the comfortable range of 23 degree C to 25 degree C in indoor space.

Study of Electro-pneumatic Braking system and difference between conventional air braking and Electro Pneumatic Braking.

Jan 2017 - Feb 2017

Project done at "south central railways", Lallaguda, Telangana.

EDUCATION DETAILS

BTech, Grade: 56%, CVR College of engineering, Mechanical Engineering, 2014 - 2018

Intermediate, Grade: 59.9%, Narayana junior college, BIEAP, 2012 - 2014

High school, Grade: 7.5cpga, Bhashyam public school, APBSE, 2002 - 2012

SKILLS

Python, HTML, CSS, Javascript Java, SQL.

Strength

Love to learn and explore new topics, good in achieving tasks given as an individual or in a group. I find myself good in learning new topics within the required amount of time.

Career Aspiration

To seek challenging software assignments and responsibility with an opportunity for growth and career advancement as well as organization development as a successful achievement.
